

ECO-FRIENDLY PLASTIC FOOD CONTAINERS

Eco-friendly food packaging and containers are materials and products that are easy to process and recycle, conserve material resources, make effective use of untapped resources or any combination of these qualities. And, they offer good hygienic safety. These resource-saving products are made of a composite material consisting of a polypropylene (PP) base charged with a high concentration (40 - 55%) of natural talc, an unused resource. Resistant to heat, it can even be used to warm foods that contain oil.

LUNCH AND EVERYDAY CONTAINER / TAKE-OUT CONTAINER / PLATES, ETC.

Food Container **DB-17**
6-3/4" Diameter x H3"

Food Container **Small Bowl**
5" Diameter x H3-1/2"
