

# ECO-FRIENDLY NON-WOOD PULP

We launched these pulp molds with the idea of supporting the fight against climate change by protecting forest resources. The molds are made of bagasse, marsh reeds and bamboo. Bagasse is the leftover waste after pressing sugarcane, so large quantities are generated in the process of making sugar. Making paper from bagasse not only directly protects forest resources by using alternative materials to wood pulp, but it also requires less energy to process because it is softer than wood.

ECOLOGICAL SUSHI CONTAINER / TAKE-OUT CONTAINER / PLATES, ETC.

**8" Take Out Container, Device** **A-SH08-3**  
W8" x L8" x H3-1/4"

**8" Take Out Container** **A-SH08**  
W8" x L8" x H3-1/4"

**9" Take Out Container, Device** **A-SH09-3**  
W9" x L9" x H3-1/4"

**9" Take Out Container** **A-SH09**  
W9" x L9" x H3-1/4"

**Burger Tray A** **P-HB06**  
W6" x L6" x H3"

**Burger Tray B** **A-SH80**  
W6" x L6" x H3"

**Take Out A** **P-SH89**  
W9" x L6" x H3-1/4"

**Take Out B** **A-SH89**  
W9" x L6" x H3-1/4"

**Party Tray** **A-SH08-3**  
9" Diameter x H1/2"

**Sushi Container S** **810 (0.4)**  
W6-1/2" x L3-1/2" x H1-3/4"

**Sushi Container M** **813 (1.0)**  
W7-1/4" x L5" x H1-3/4"

**Sushi Container L** **814 (1.5)**  
W8-1/4" x L5-1/4" x H1-3/4"
